

Study Project: Adversarial Machine Learning

Introduction

After finishing the practical parts of your project, in the last part of the study project you should prepare a final report, in which you describe the goal and the implementation of your project in detail, as well as a final presentation, in which you introduce your project to the audience.

Task 1: Final Presentation

Deadline: 04.02.2026

In this task, you should prepare slides and use them to present your project to the audience. The duration of your presentations **should be 30 minutes**. You should not do a demo during the presentation. In addition, in your presentation you should include the following aspects:

- a) Briefly motivate and describe the **scientific problem** / **research question** considered in your project.
- b) Briefly introduce terms that are important to understand your presentation (**also for people who did not participate each Q&A session**).
- c) Describe the (most important) practical parts of your project, what/how/why you execute single steps of your project.
- d) **Discuss results obtained from your project and summarize the takeaways that you can conclude from your work.**

Task 2: Final Report

Deadline: 11.03.2026

In this task, you should prepare a final report, in which you should include the following aspects:

- a) *Motivation and description of your scientific problem:* Elaborate in detail what scientific problem / research question your project considers and why it is important to study it.
- b) *Background information:* Introduce and explain all terms, metrics, etc. related to your project such that your report is self-contained. A reader who did not participate the study project should be able to understand your report.
- c) *Description of all practical parts:* Describe and explain each practical part of your project in such a way that each step is reproducible. Always motivate / discuss why a given step is important to solve your scientific problem / research question.
- d) *Evaluation of your project:* Discuss all results obtained from your project and summarize the takeaways that you can conclude from your work.
- e) *Conclusion and future research:* Conclude your report by summarizing what you achieved during the study project. Discuss possible questions of interest for future research.

Your report should be *at least 15 pages* long, excluding title page, table of content, references, and appendix. Moreover, pieces of code longer than 10 lines should be always put in the appendix. Please use the L^AT_EX template uploaded in Moodle together with this sheet for your final report. Please note that the use of L^AT_EX is mandatory.
